World The 13th Creativity Festival

Welcome message

We welcome you all to the 13th World Creativity Festival: Mind Frontier 2017.

The 13th World Creativity Festival: Mind Frontier 2017 will take place at the Korean Advanced Institute of Science and Technology(KAIST) in Daejeon, Republic of Korea.

The World Creativity Festival(WCF) was evolved from a national competition held annually since 1997 and started to invite students from all around the world from 2005. When this festival was internationalized in 2005, WCF was given another title, which is Mind Frontier.

The main goal of Mind Frontier is to stimulate students' interest on creativity achievement in science and technology by networking talented students together from various countries and providing them with opportunities for scientific and cultural experiences.

We have given a different theme to the festival every year. The theme of Mind Frontier 2017 is Improving Safety. We expect all participating students to expand their vision into another level by sharing their knowledge and experiences with talented students from other countries.
We hope you all fully enjoy this festival, Mind Frontier 2017.

What is World Creativity Festival: Mind Frontier?

Mind Frontier is a festival for both Korean and international students to compete and challenge their abilities and creative skills in problem solving. It has been a national event held since 1997, and took its second step into international arena in 2005.

The main events of Mind Frontier are competitions, in which participating students will have to demonstrate their creativity and be evaluated by international judges. Moreover, students can also enjoy social and cultural experiences with smart students from various countries via such special programs as Buddy Buddy, Market Place, Talent Show and more.
